- 9. Documentation 5**

1. Content of Product Release

1.1. Swyx Product

Component	Filename	Version/Build
Estos Meta Directory	-	4.0.6.6134

1.2. Interworking Products

Component	Filename	Version/Build
IIS	-	V10 or newer
Microsoft NET Framework	-	V4.0 or newer
SQL Server 2014 Express	-	V12.0 or newer

2. Document History

Version	Date	Remarks	Editor
1.0	31.01.2019	Initial creation for Product release V4.0.6.6134	Product Management

3. Product Version History

Version	Date	Remarks	Editor
V4.0.1.5574	09/2017	Major release version 4	Product Management
V4.0.6.6134	01/2019	Minor update of version 4	Product Management

4. Changes

This version is a minor release of Estos MetaDirectory V4, which is fully compliant to SwyxWare, SwyxIt! and Visual Contacts in version 11.x.

Main changes of Estos MetaDirectory V4.0.6.6134 can be found here:

https://www.estos.de/no_cache/s/dnl/Dokumente%7CRelease%20Notes%7CMetaDirectory%7CDeutsch%7CMetaDirectory%204%20Releasenote%20de

5. Supported Products

Type	Product	Preferred Version
Server	SwyxWare	11.x tested with SwyxWare 11.32
Client	SwyxIt!	11.x
Server OS	Windows Server	2008 R2 (SP1), 2016
Desktop OS	Windows	7, 8, 8.1, 10

We recommend customers use the "Preferred Version" for the given products. The preferred software versions offer tested and confirmed level of functionality. However, the devices might also operate with older or newer software version with the caveat that recently added interoperability or advanced features may not be possible when using these versions. In cases, if a defect is found when using other versions, it may be necessary to update to the supported version.

6. System Requirements

To enable a stable performance of Estos MetaDirectory, server administrators must consider the system requirements for Estos MetaDirectory (not including SwyxWare):

Max. Users	RAM	Disk Space	CPU Cores	CPU Cores (virtualised)
20	1 GB	20 GB	2 (for example Intel i3)	1
100	1 GB	40 GB	2 (for example Intel i3)	1

In case it is intended to install SwyxWare and Estos MetaDirectory on the same server, the combined system requirements of SwyxWare and Estos MetaDirectory need to be fulfilled.

7. Known Issues

-

8. Support

The Support for the Estos MeatDirectory is handled through the regular Swyx Support process. This release does not contain availability of DATEV integration. This functionality will be released separately.

9. Documentation

The current version of Estos MetaDirecotry is available here:
