### Resolved Reported Problems/Symptoms:

- Phone performance affected by conversation list
  - If the conversation list of the phones contains a lot of entries (e.g. 150-200) the phones became slower.

### Known Bugs:

- None

## 5 Update Procedure

To update the firmware at your SwyxServer you must perform the following steps related to the installed SwyxWare version:

Open the Server Settings within the SwyxWare Administration and select the tab "SwyxPhone Firmware Update". Within this configuration select the option "Get". Hereby the SwyxServer will contact the Swyx FTP server (<ftp.swyx.com>) which is configured by default and downloads the latest firmware version. To update the firmware at your SwyxServer you have to perform the following steps related to the installed SwyxWare version:

After this you could validate that the new firmware was download by checking the firmware version information:

If the firmware version (V1 R2.8.0) is listed for all SwyxPhones L6x, the phones of this type will prompt for a firmware upgrade the next time the user logs on.

## 6 Supported SwyxWare Versions

Product	Supported Version
SwyxWare / SwyxON	SwyxWare 11 (verified with SwyxWare 11.32)

We recommend customers use the latest productive version for the given products. The supported software versions offer tested and confirmed level of functionality. However, the devices might also operate with older or newer software version with the caveat that recently added interoperability or advanced features may not be possible when using these versions. In cases, if a defect is found when using other versions, it may be necessary to update to the supported version.

## 7 Support

The Support for the SwyxPhones L6x is handled through the regular Swyx Support process.

## 8 Documentation

The current documentation can be found on the Swyx homepage.
